### **Abstract**

Digitization has a significant impact on the instructive-educational act in school organizations and determines easy and fast access to a wide range of educational resources, including e-books, videos, simulations and interactive materials. This enriches the learning experience and allows teachers to provide concrete and varied examples. The purpose of this study is to obtain the necessary information to be able to identify the effects of digitization on the instructional-educational act. The opinion poll was used as a research method for the case study, the research instrument being the questionnaire.

### **Keywords**

digitization, instructional - educational act, school organization, teaching staff.

### **JEL Classification**

M15, O15
